

## Kycon Maximizes Micro USB Connector Options

San Jose, CA – Aimed at mobile phones, PDAs and digital cameras that require continuous space reduction and exacting demands in durability, Kycon introduces a mid-mount option to their existing Micro-USB product line; the KMMLX Series. The KMMLX Series

utilizes the mid-mount design for increased stability while still providing a 50% more compact footprint (in comparison to Mini-USBs) that allows for greater space-saving solutions in portable devices.

The KMMLX Series expands the existing Micro-USB line (KMMX Series) which now includes a Micro-B receptacle mid-mount style, surface mount shielded Micro-B receptacle, and a surface mount shielded Micro-AB receptacle. All Micro-USB products meet the USB Implementers Forum Specification, which supports the USB On-The-Go (OTG) supplement, allowing users ease of portable point-to-point connectivity.

In 2009, Kycon, Inc. was named the **#1** connector company in overall product quality, delivery reliability, sales support, customer service function, and website usability, by Bishop and Associates, a connector industry consulting firm. Kycon is committed to excellence in products and service. Continually broadening their product offerings – including customized solutions -- Kycon maintains clear focus on quality, while upholding world-class service and support that has consistently earned them Bishop's top-rankings for customer satisfaction.
