

Notice of Discontinuation

2/5/18

Re: Planned EOL

Part number: KMDLX Series

The part number series listed above will be discontinued due to worn tooling. We will offer a last time buy through 4/30/18.

We suggest Kycon KMDGX series as an alternative. Redline drawings are attached with this letter for your reference. The alternative is not a drop in replacement so we recommend you test in your application prior to ordering.

<u>Current P/N</u>	<u>Suggested alternate</u>
KMDLX-xS-AS	KMDGX-xS-AS
KMDLX-xS-BS	KMDGX-xS-BS
KMDLX-xS-N	KMDGX-xS-N

As outlined in the redline drawings, there are 2 major differences:

The KMDLX is silver plated in both the contact area and on the solder tails. The KMDGX is gold plated on the contact area and tin plated on the solder tails. Solderability should not be affected.

KMDLX is a snap & lock connector in all options. KMDGX is only locking when used with BS shield option

Please feel free to contact your Kycon sales person to request samples for testing
